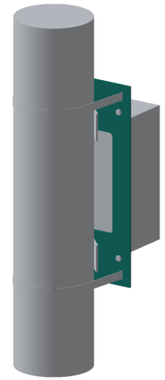
RIGHT VIEW

Scale 1:5; looking at the right side (along -X)



WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Blank 160 x 300 mm, 3 mm aluminium. Front view is the face the box sits on.
Heights from the bottom edge; sideways from the centre line.
Window 100 x 150 mm, 6 mm corners, 75 to 225 mm up: drill the corners
12 mm, cut between with a jigsaw, file straight. It saves weight.
Band slots 3 x 15 mm at 66 mm each side, centred 17 and 283 mm up:
chain drill 3 mm and file square. The bands pass through these.
Lug screws 5.5 mm at 62 mm each side, 41 and 259 mm up.
V-saddle screws 4.5 mm on the centre line, 42, 62, 238 and 258 mm up;
countersink from the front so the screw heads sit flush.
Deburr every hole and edge; round the corners to about 2 mm.
Fit: V-saddles on the back, the enclosure on the front between the
bands; each band crosses the front above or below the box.
Check: lay the saddles and lugs on it and look through each hole.
