**WHERE IT GOES**

This part in colour, its neighbours in grey

**HOW TO MAKE IT AND HOW IT FITS**

Cut two 40 mm lengths of 40 x 40 x 4 angle; square and deburr.
Upright leg (goes on the plate): two 6.6 mm holes 10 mm each side of the middle, 22 mm from the heel (the outside corner).
Flat leg (goes on the tube): two 6.6 mm holes on the middle line, 15 and 30 mm from the heel.
Both brackets are the same; one goes on top of the tube, the other underneath, upside down.
Fit: the upright leg on the plate's front, its heel at the tube's top (or bottom) face; M6 bolts through the plate, nuts behind.
Two M6 bolts go down through both brackets and the tube, each with a crush spacer inside the tube.
Check: the bracket sits flat on both the plate and the tube.
