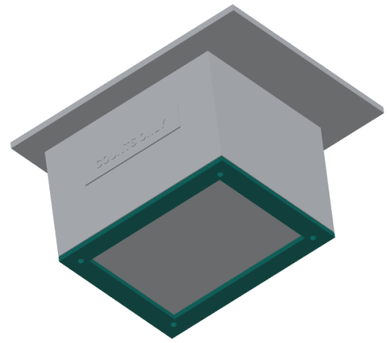
RIGHT VIEW

Scale 1:1; looking at the right side (along -X)



WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Frame: print flat in ASA, 110 x 90 x 3 mm with an 88 x 68 mm opening and four 3.4 mm holes, 47 and 37 mm each side of centre.
Film: cut 100 x 80 mm from 0.5 mm unpigmented HDPE with a sharp knife on glass; do not touch the middle with bare fingers.
Use the frame as a template: punch four 3.5 mm holes in the film.
Fit: film on the housing ledge, frame over it, four M3 screws into the heat-set inserts, tightened evenly until the film is flat.
The array looks through the 88 x 68 mm opening; the field of view needs only about 30 x 20 mm of it.
Check: the film is flat and taut with no creases in the opening.
