WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Cut two 35 mm lengths of 50 x 50 x 5 angle.
Trim the flat leg to 30 mm wide (from the heel) so it fits on the disc.
Upright leg: two 8.5 mm holes at mid-length, 12 and 28 mm up from the bottom face of the flat leg.
Flat leg: two 5.5 mm holes 19 mm out from the upright leg's inside face, 9 mm either side of mid-length.
Both clips are the same; they face each other across the post.
Fit: flat leg on the disc, upright leg against the post; two M5 countersunk screws up through the disc, nuts on top.
Check: the clips stand square on the disc, 42.4 mm apart inside.
