WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Blank 290 x 150 mm of 3 mm sheet; the long side runs up the slope.
Lip bolts: four 4.5 mm holes 6 mm in from each short end, 50 mm each side of the centre line (they go through the panel's lip).
Clip screws: four 5.5 mm holes, 51 mm each side of the centre line, 15 and 30 mm below the middle (toward the low edge).
Two lightening windows 90 x 90 mm, 6 mm corners, centred 85 mm each side of the middle along the long side.
Lanyard hole 6 mm on the middle line, 12 mm in from one long edge.
Deburr everything.
Fit: the panel's frame lip sits on the plate's ends; M4 bolts with the nuts inside the frame. The upper clips go underneath.
Check: the panel lip holes line up with the plate's end holes.
