WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Blank 150 x 200 mm of 2 mm aluminium; round the corners 5 mm.
Four tie slots 3 x 10 mm, 60 mm each side of the centre line,
centred 30 and 170 mm up from the bottom edge.
Print or apply a UV-stable face: what is counted, "No images are
stored or sent; only counts leave the device", and the repository link.
Fit: the back lies against the pole, centred on it; two stainless
steel cable ties pass round the pole and through the slots.
At the site it goes at eye height, about 2.6 m up, facing the
sidewalk.
Check: the ties pull the plate flat against the pole.
