WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Cut two 40 mm lengths of 36 mm round bar; face both ends.

Turn or file to a push fit in the post's 36.4 mm bore.

Push one into each end of the post, flush with the end.

Drill through with the post (8.5 mm, as the post sheet shows).

The plugs stop the thin post wall from crushing when the M8 cross bolts are tightened.

Check: flush with the post end; the bolts slide through freely.

CURBCOUNT
